FOR IMMEDIATE RELEASE

91 Project to Reduce Travel Lane on 91-15 Connector in Corona

The 91 Project in Corona will require the connector from the eastbound 91 to the southbound 15 to be reduced to one lane starting Tuesday, February 17 and continuing for approximately three months.

A full closure of the connector will be required from 10 pm on Monday, February 16 to 5:30 am on Tuesday, February 17 for crews to place concrete barriers, known as K-rail. The lane reduction will begin the morning of Tuesday, February 17 to allow crews to begin work on the new connector for this project. These dates are subject to change, based on various construction factors.

Motorists are reminded to:

- Slow down, watch for changing conditions and allow extra travel time
- Watch for changeable message signs about the upcoming lane reductions
- Be courteous and merge to the single lane early to avoid unnecessary traffic delays
- Adjust travel plans to off-peak hours, if possible, or use alternate routes
- Carpool or use public transit, when feasible

Led by the Riverside County Transportation Commission, the 91 Project is adding regular lanes, tolled express lanes, auxiliary lanes and direct express lane connectors from the northbound 15 to the westbound 91 and from the eastbound 91 to the southbound 15. Improvements to interchanges, ramps, lanes and surface streets also will be made along the 91 between the Riverside County/Orange County Line in Corona and Pierce Street in Riverside. The new lanes are expected to open in 2017.
