### FOR IMMEDIATE RELEASE

### **91 Project in Corona Reaches 91% Completion Milestone**

The Riverside County Transportation Commission's 91 Project is now 91 percent complete, with the new lanes on schedule to open this spring.

Construction of this \$1.4 billion project began in 2014 to extend the 91 Express Lanes from the Orange County/Riverside County Line to Interstate 15, add general purpose lanes and auxiliary lanes, and improve interchanges, bridges, ramps and local streets.

The new lanes will offer a choice and time savings to motorists, allow faster emergency response, enhance air quality and promote access to public transit.

Although new lanes will open in the spring, project construction will continue through late 2017. Nighttime closures will be continuing, and motorists are reminded to allow extra travel time, adhere to the 55 MPH speed limit, follow detour routes, patronize local businesses and use [IE511.org](http://IE511.org) for real-time traffic information.

The 91 Project is adding regular lanes, tolled express lanes, auxiliary lanes and direct express connectors from the northbound 15 to the westbound 91 and from the eastbound 91 to the southbound 15. Improvements to interchanges, ramps, lanes and surface streets also will be made along the 91 between the Riverside County/Orange County Line in Corona and Pierce Street in Riverside.
